Thanks, Tom.

It would be great if you could modify the attached table.

Also, we need to add a brief summary of the literature search strategy to the hazard synthesis section. The level of detail varies right now, so it can be something rough that we can later modify, but here are barbara's and my versions (mine goes on to describe the quality evaluations):

Ex. 5 Deliberative Process (DP)

Andrew,

I have attached the text on human cancer epi literature search, the powerpoint graph of the same search, and the study quality tables for the human cancer studies.

Please let me know if anything else is due to you at this time.

Thanks,

Tom
